

the 1990s, the number of people in the world who are undernourished has declined from 1.1 billion to 800 million, and the number of people who are malnourished has declined from 1.5 billion to 1 billion.

There are a number of reasons for this decline. One is that the world's population has grown, but the growth has been slower than in previous decades. Another is that the world's population has become more affluent, and this has led to a decline in the number of people who are undernourished.

There are a number of reasons for this decline. One is that the world's population has grown, but the growth has been slower than in previous decades. Another is that the world's population has become more affluent, and this has led to a decline in the number of people who are undernourished.
